

Senior plc announces contract awards from Airbus

Senior plc (“Senior”), an international manufacturer of high technology components and systems, today announces it has been awarded two separate contracts to supply a number of complex components to Airbus SAS and Airbus Atlantic.

For Airbus, a multi-year contract extension has been agreed for the manufacture and supply of various aerostructure parts used in the Airbus A320 and A330 aircraft programs, including aluminium parts and assemblies used throughout the aircraft. Deliveries commenced in January 2024, with manufacturing undertaken at Senior Aerospace UPECA (“UPECA”) in Malaysia and Senior Aerospace Thailand (“SAT”) facilities.

Separately, Senior Aerospace Thailand has also been awarded a contract from Airbus Atlantic for the supply of business class seat structures to a major European airline, with production deliveries beginning in early 2024. This contract builds on SAT’s longstanding experience in manufacturing and supplying complex seat structures and assemblies for commercial aircraft.

Commenting on the awards, Launie Fleming, CEO of Senior Aerospace, noted: “These contract awards underline Senior’s position as a trusted, long-term partner to the largest and most important original equipment manufacturers. The contract awards build further on our existing strong relationship and we look forward to supporting Airbus with these and future contracts.”

About Senior Aerospace

Senior Aerospace provides high technology products and systems for demanding applications in the aerospace & defence and adjacent markets. Our product portfolio spans a wide range of fluid conveyance and thermal management components and sub-systems, as well as complex structural parts and assemblies for fixed and rotary-wing aircraft, aero-engines, spacecraft, and a variety of other industrial applications. With a global footprint, Senior Aerospace manufactures proprietary design and build-to-print products for customers around the world that meet today’s challenges and is actively engaged in developing products and capabilities for a low carbon sustainable future.

About Senior

Senior is a FTSE 250 international engineering and manufacturing Group with operations in 12 countries. It is listed on the main market of the London Stock Exchange (symbol SNR). Senior’s Purpose is “we help engineer the transition to a sustainable world for the benefit of all our stakeholders”. Senior designs and manufactures high technology components and systems for the principal original equipment manufacturers in the worldwide aerospace & defence, land vehicle, and power & energy markets.
